

saddle

specifications
5 year warranty

The Saddle Stool is designed to maintain an optimal seating position. Fully ergonomic, the stool helps the individual find the most natural and comfortable seating position.

As the user's pelvis is positioned correctly, the Saddle Stool produces less stress for muscles, joints & ligaments; which in turn relieves stress on the lumbar discs & spine.

This is a great stool for dental surgeries, physios, musicians & hairdressers to name a few.

Optional back rest for a comfortable resting position.
